

Name _____

Ecological Footprint

Go to the Redefining Progress website: [http:// www.myfootprint.org/](http://www.myfootprint.org/) and take the ecological footprint quiz. Enjoy and use the resources offered by this site to enhance your paper.

Visit Wackernagel's Global Footprint Network website: www.footprintnetwork.org for additional information to make your report complete.

You may take the quiz from the point of view of your current living situation, home situation, or dream lifestyle, but state clearly what point of view you used. Summarize, explain, and interpret the results of the test (for example, what were your 'best' and 'worst' categories, and why?) Feel free to check out other links on the website and include these in your discussion.

Critique the test. What were the strengths and weaknesses of the test itself? Discuss one specific thing that you could do or would like to do to reduce your footprint. What would be the global impact of your change?

This assignment should not exceed 1 page, single-spaced, 12-point font, Times New Roman. Include your name, instructor's name, and clearly in the upper right hand corner. Include a spiffy title. A well-placed staple in the upper left hand corner of your submittal should be adequate. We are more interested in content.

ATTACH THE RESULTS PAGE (not the entire quiz).
