

## Luciano Kay

---

Using Bibliometric and Patent Analysis to Map  
Global Innovation Pathways in Nanotechnology

---

Wednesday, June 27, 2012  
2320 Girvetz Hall: 2:00 - 4:00 PM

Luciano Kay discusses how bibliometric and patent analysis techniques supply insights into the trajectories of emerging nano-science and innovation pathways in nanotechnology enterprise and applications in the U.S. and worldwide. He will also discuss his experience using other research methods and strategies, including global databases, data and text mining, and network analysis and visualization techniques.

---

Luciano Kay is a postdoctoral scholar with CNS-UCSB's Interdisciplinary Research Group 2, studying Globalization and Nanotechnology. He holds a Ph.D. in Public Policy from the Georgia Institute of Technology where he worked for more than five years with the Program in Science, Technology, and Innovation Policy (STIP).
